Not completed

Brief Description

Partners in Development were contracted to design and supervise the construction of a rural water supply scheme for a community of 37,000 people. The project infrastructure included:

- Drilling and equipping of 5 boreholes and pumpstations
- Erecting 8 elevated steel tanks ranging from 100kl to 250kl in capacity
- Upgrading the abstraction from Lake Sibaya
- Upgrading of package treatment plant
- 167 Public tap stands
- 60 km of reticulation pipe lines
- Three water offices
