

Symonds Stream, Detention Pond – Erosion Control Structure

Project

Symonds Stream Detention Pond - Erosion Control Structure

Location

Howick
Umgeni Local Municipality
Kwa-Zulu Natal
South Africa

Client

The Umgeni Local Municipality

Project Manager

D. Still

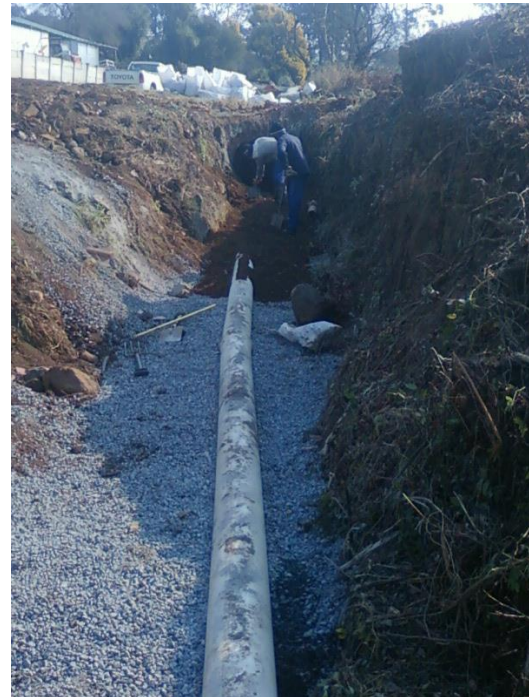

Project Value R 48,000-00

Date Completed July 2010

Brief Description

PID Were asked to design and construct an erosion control and protection structure for the Symonds Stream detention pond and sewer outfall which runs next to the stream.

This was achieved by the use of gabions and Reno- mattresses. The outfall sewer was also realigned and stabilised.

PID REF: 522
